

## Amenity Upgrade in a Modern Building

2125 14th Street - Washington, DC

When a prospective building considering Starry asks for a reference, DJ's contact information is likely exchanged. "I was VP of our 208 unit condo building for 3 years and Starry was the only time we gave owners a new amenity at zero cost to the building." When asked about the implementation process, DJ recalls "Starry was very detailed and kept us informed every step of the way."

Though DJ is no longer on the condo board, he continues to live in the building and subscribe to Starry internet. "The service is flawless. The speed has been faster than promised, actually. And my friends in the building have been just as happy."

*"I think people get nervous about Starry because it sounds too good to be true. But this is a rare case where it's all good and it's true."*
