

## Meet a Condo Board MVP

1825 T Street - Washington, DC

After receiving a postcard from Starry, Allie, an owner and board member at The Meredith, was excited at the prospect of having a new, affordable internet option in her building. Frustrated with the providers available in her recently purchased condo, she invited the Starry team for a site visit. When Starry confirmed the serviceability of the 49 units within the 67-year-old condo building in DC's Dupont Circle, Allie presented Starry to her neighbors at the next board meeting.

Stephan, a 20-year owner at The Meredith, learned about Starry from Allie's presentation. He was thrilled by the prospect of having fast internet for a fraction of the cost, especially as a remote worker dependent on a reliable internet connection. With the residents' enthusiasm and board's approval, Starry Internet went live in The Meredith.

To date, 39% of The Meredith's residents have subscribed to Starry Internet. Allie considers adding Starry as an amenity to the building a huge asset. Starry works to make the addition of a new ISP as easy as possible, by covering all costs of installation and maintenance, providing management with information and Starry-branded swag, and offering same-day installation to residents. Moreover, residents are excited to get increased internet speeds and decreased monthly bills.
