Here are a few things it can do:

See what's connected
Starry Station shows connected devices and how much data they're using.

Share the WiFi
The WiFi network name and password are easily accessible, making it easy to share the WiFi.

One tap to anything
The navigation screen allows easy access to advanced Starry Station features like ScreenTime parental controls or guest networks.

Support when it's needed
Request a phone call from support directly from the touchscreen.
